digital

RibFix Blu[®]

Thoracic Fixation System

Rib fixation system **RibFix Blu**, is used in the stabilization and rigid fixation of fractures in the chest wall.

Visit www.zimmerbiomet.com for more information.

IMPORTANT INFORMATION

Registration

Please make your registration for the ESTES VIRTUAL WEEK online. The regular congress registration also includes the use of the on demand material after the congress.

On demand – Congress material after the congress

The presentations of the congress are available on demand on the digital congress website until 31 May 2021.

Certification

Please note that the recognition of credit points only applies to the live programme of the digital congress from 25–30 April 2021, but not to the viewing of congress material after the congress from 01 May 2021.

EACCME

An application was submitted to the European Accreditation Council for Continuing Medical Education (EACCME) for European CME credits (ECMEC), which are internationally transferable.

German accreditation

Additionally, an application was handed in to the Medical Chamber of Thuringia for the CME credits for German participants. If you did not provide your EFN number (the number on your medical card) when registering, please store it in your participant profile for the digital congress.

Important information for your digital congress participation

You are not yet familiar with the digital concept? You can find all the details in our [user guide](#) and in our [FAQs](#).

Speaker instructions

Detailed information for the preparation, submission and presentation of your lectures can also be found on the [congress website](#).

Deadline

8 April 2021

One room. One system. Many possibilities

Alphenix High Definition technology

With a streamlined workflow in a single setting, you no longer need to transfer the patient between rooms, improving patient care and boosting productivity. Switch easily between CT and angiography systems to diagnose, treat or verify. Across a wide range of clinical applications Alphenix 4D CT offers more possibilities to deliver safer, better treatment to your patients.
