

ISHR BERLIN 2022

SCIENTIFIC PROGRAM COMMITTEE – ISHR INTERNATIONAL SYMPOSIA

The development of a stellar program of Congress speakers reflects the generous contributions of the members of the Scientific Program Committee. These researchers are nominated by Sections to participate in one of the 7 research Theme Groups. Together the Theme groups rank and shape symposia proposals submitted by any member of the Society. For the 2022 Congress a total of 150 Symposia were submitted comprising 455 unique speakers nominated. Ultimately the ranking and selection process, outcome generated 24 ISHR_INT funded symposia, each with 5 invited speakers and one speaker selected from submitted abstracts. While research excellence is paramount, ensuring diversity is a key priority in the shaping of the symposia program – especially considering speaker gender, career stage and geographical attributes. The expertise and work of the Scientific Program Committee is much valued.

Sections denoted: Europe (EUR); North America (NAM), Japan (JPN); Australasia (AUS); Latin America (LAM); China (CHN)

SCIENTIFIC PROGRAM CHAIR

Lea Durham Delbridge
Secretary General, ISHR
